Meaning What is it?

“Meaning is the web of connections, understandings, and interpretations that help us comprehend our experience and formulate plans directing our energies to the achievement of our desired future. Meaning provides us with the sense that our lives matter, that they make sense, and that they are more than the sum of our seconds, days, and years.”

Significance: What I do matters

Purpose: I have a future

Coherence: Things make sense

Significance

Purpose

Coherence

Baumeister, 1991; Heintzelman, Trent, & King, 2013; Milgram, 1970

Study 1 Gallup World Poll

Collects nationally representative samples
from over 160 countries in over 140 languages

Our Data

~140,000 people in 127 countries (2007)
Oishi & Diener, 2014

Our Measure

“Do you feel your life has an important purpose or
meaning?”

Presence of Meaning in Life

Simple Correlation

$$r(126) = -.33^{***} \\ [-.48, -.17]$$

Controlling for GDP

$$t(123) = -2.58^* \\$$

Study 2 Gallup Daily Tracking Poll

Surveys 1,000 Americans a day, 350 days out of the year.

Our Data

~137,000 people in 354 US cities (2014)

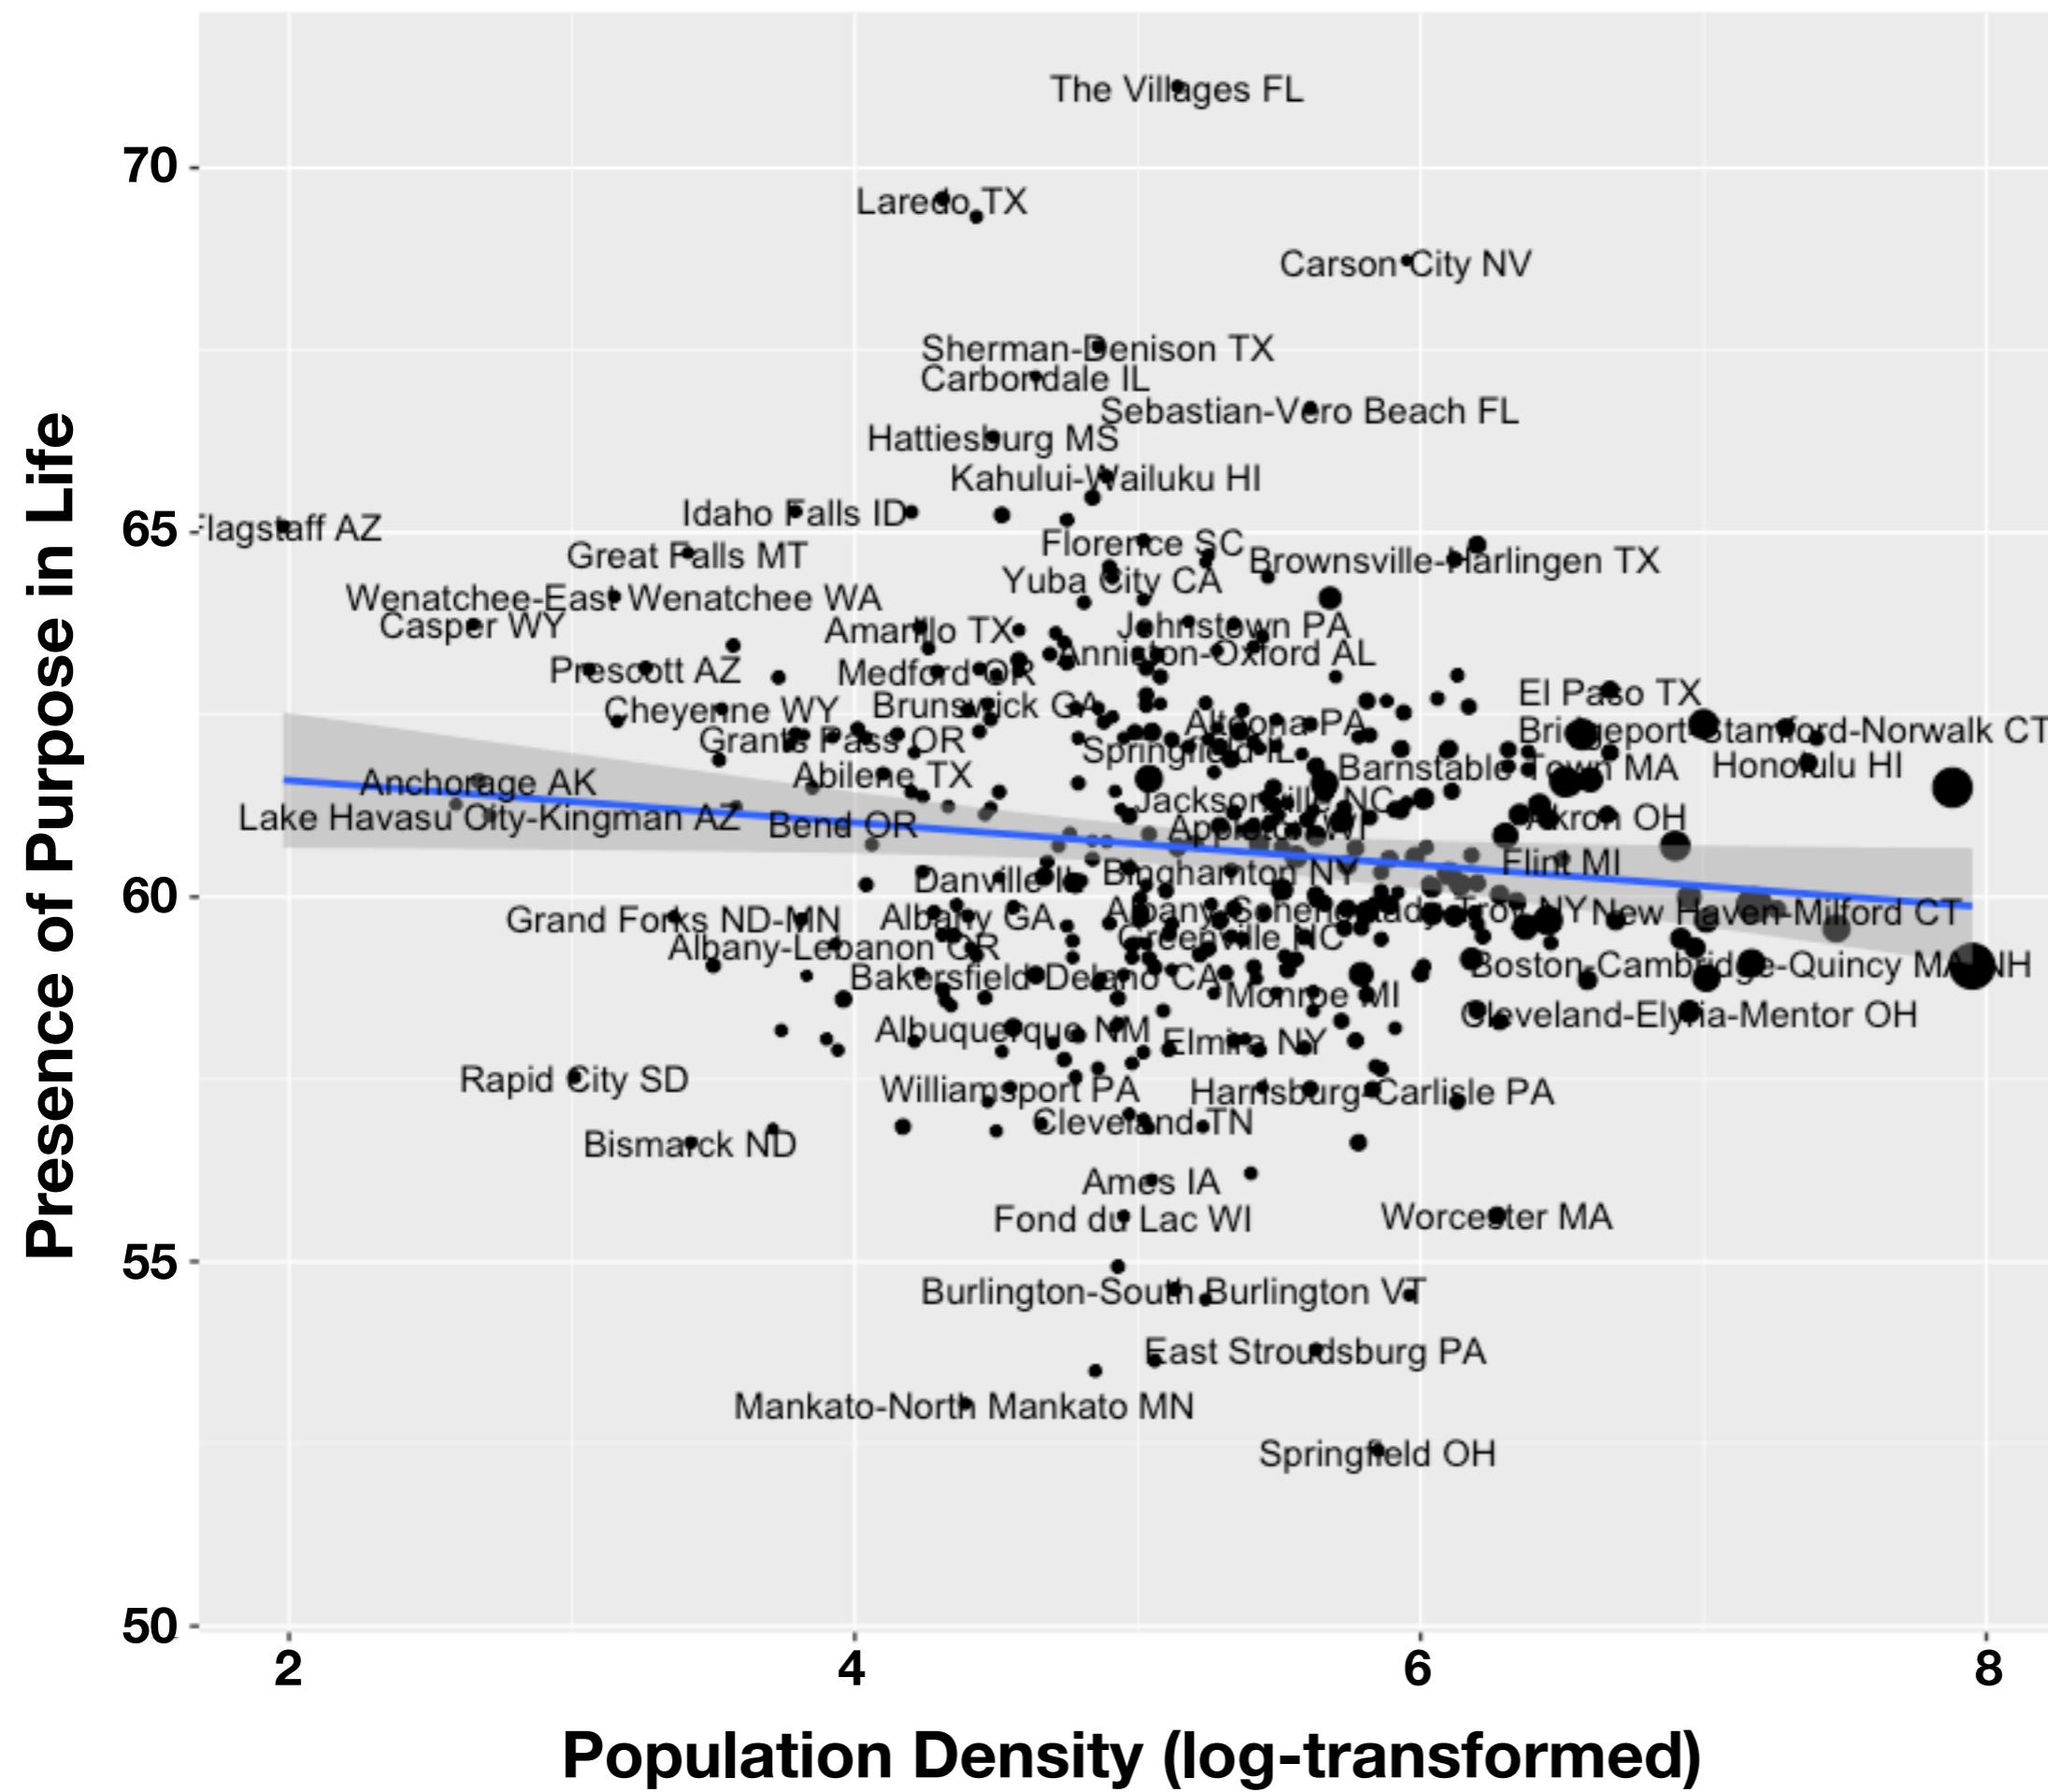

Our Measure

Gallup-Healthways Well-Being Index 2.0 Purpose Subscale

e.g. “I like what I do everyday”; “In the last 12 months, I have reached most of my goals”

Our Controls

City median household income; individual education, income, gender, ethnicity, and marital status

Simple correlation

.72) = -.11*
-.21, -.01]

With Controls

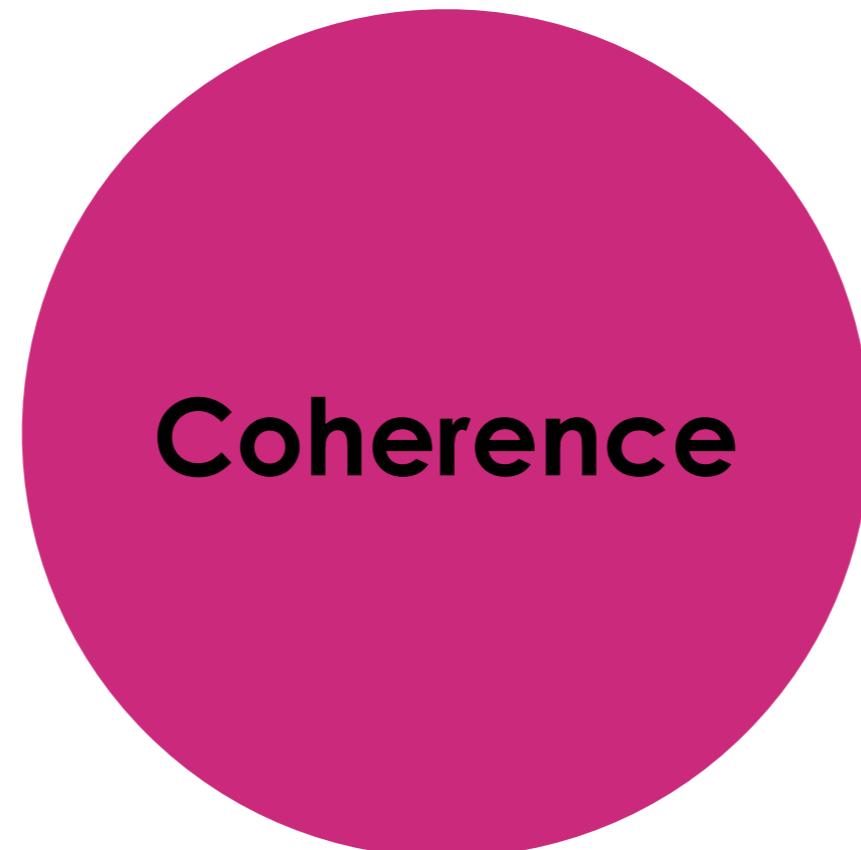

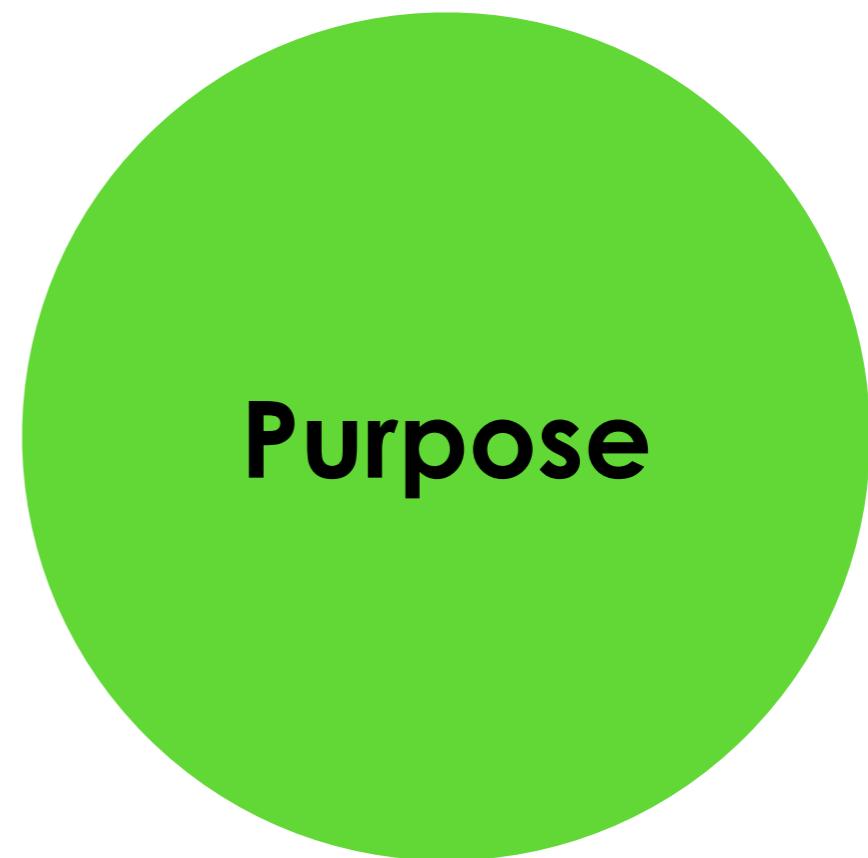

t(351) = -5.04***

Interim Summary

Across **127 countries**, with data from **~275,000 people**, using two different instruments, at **multiple levels of analysis**, we find a robust association between population density and a sense of meaning in one's life

But, why?

Components of Meaning

Significance

Purpose

Coherence

Uniqueness

- I am a unique individual
- The things I do cannot be done by anyone else
- The world would function fine without me

Power

- I currently feel in control
- I currently feel powerful
- I currently feel dependent

Integration

- I don't feel I belong to anything I'd call a community
- I feel close to other people in my community
- My community is a source of comfort

Contribution

- I have something valuable to give to the world
- My daily activities do not produce anything worthwhile for my community
- I have nothing important to contribute to society

Coherence

- The world is too complex for me
- I cannot make sense of what is going on in the world
- I find it easy to predict what will happen next in society

Manipulations Vignettes

The New York Times

The Crowded Life: Too Many, Too Much?

By STEVE ERHLICH

A few months ago, Bob Buckley and his family made their way to a local park on a sunny spring day. When they got there, they were shocked to find the park overrun with people. With no space to themselves, Bob's family couldn't help running into people—literally. They attempted to play soccer in a cramped field or find an open swing on a crowded playground, but in the end, there were just too many people. When asked about how he felt, Bob responded, "I felt very cramped. There were so many people, and no open space. It's like everywhere else these days—full of people."

Squirrels Explosion: Too Many, Too Much?

By STEVE ERHLICH

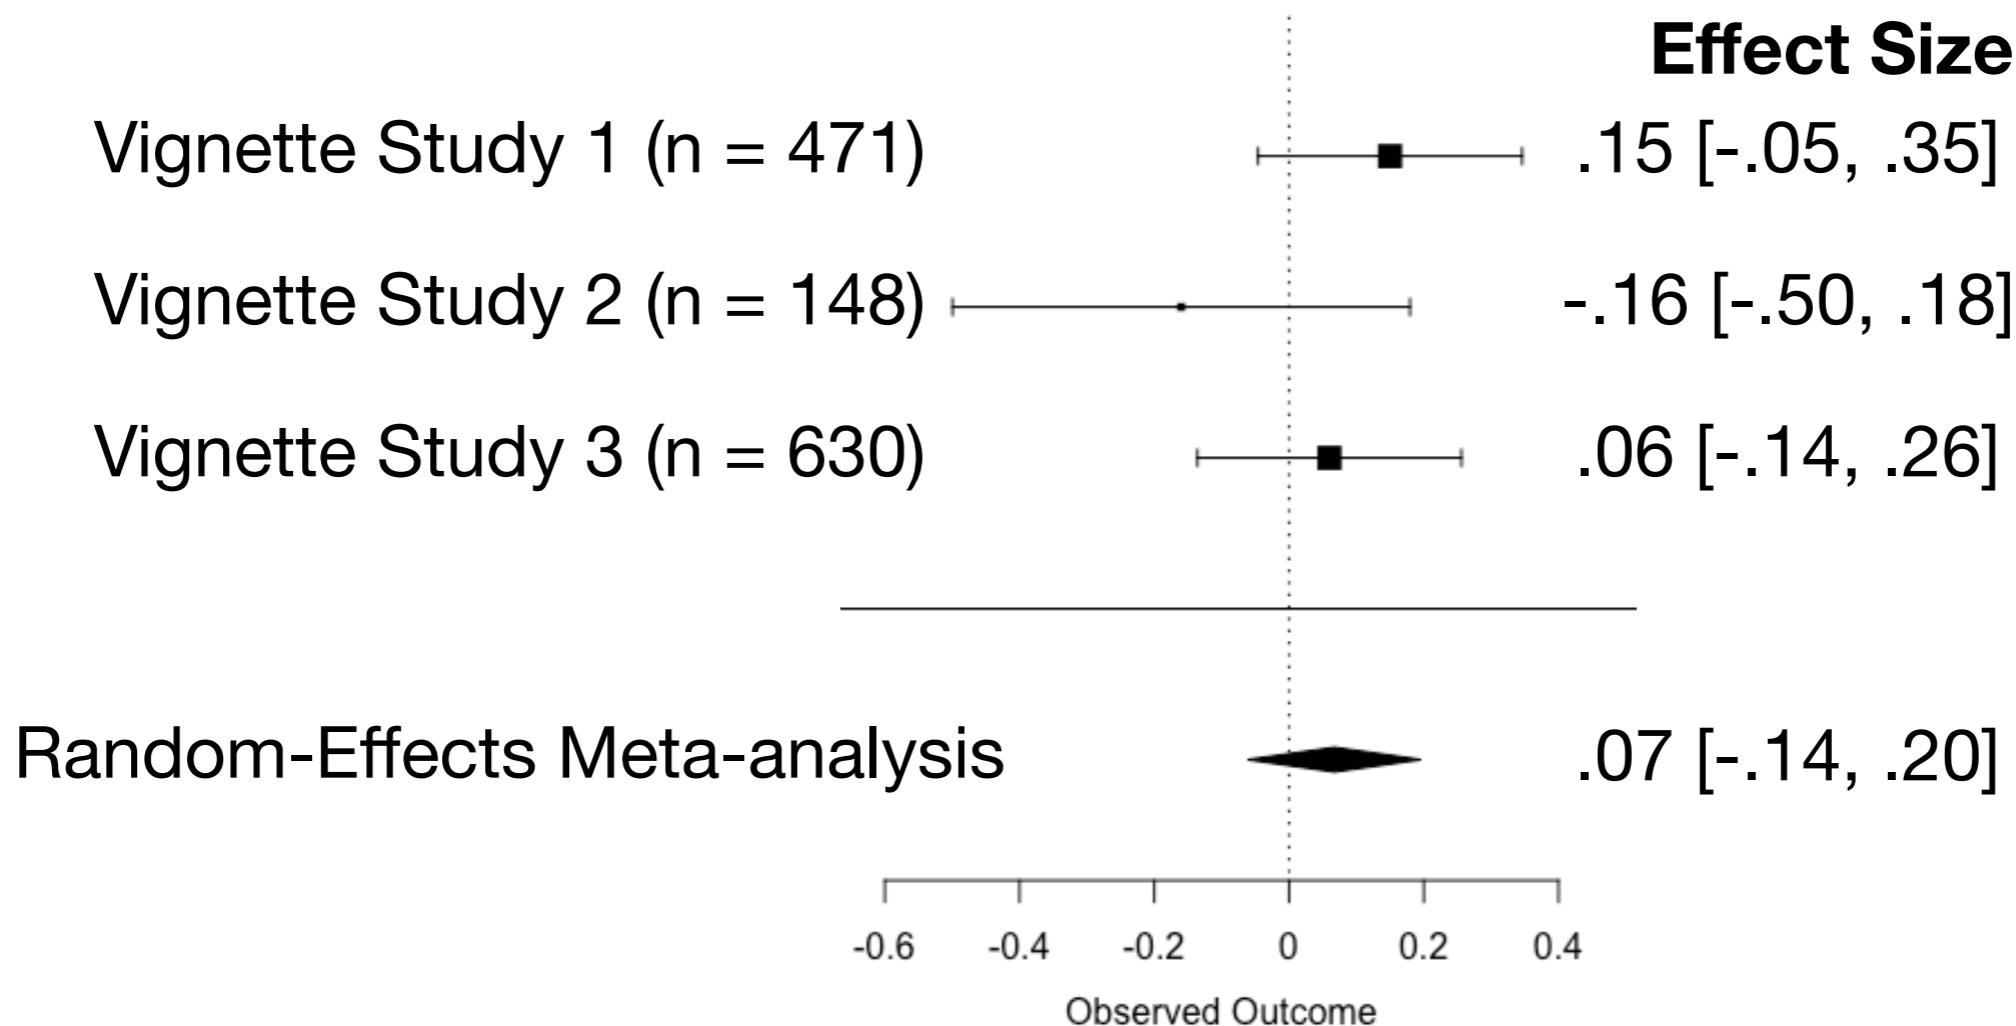

A few months ago, Bob Buckley and his family made their way to a local park on a sunny spring day. When they got there, they were shocked to find the park overrun with squirrels. Within the limited space, Bob's family couldn't help running into the creatures. They attempted to play soccer in the field or find an open swing on the playground, but it was difficult to avoid them. When asked about how he felt, Bob responded, "I felt quite overwhelmed. There were so many of the critters. It seems like this is happening in other places too."

- **IV:** Vignettes telling people that population density is rising (vs, e.g. that squirrel population density is rising)
- **DV:** Meaning in Life Questionnaire, Presence Subscale

MLQ - P

- I understand my life's meaning
- My life has a clear sense of purpose
- I have a good sense of what makes my life meaningful
- I have discovered a satisfying life purpose
- My life has no clear purpose

Manipulations Vignettes

Population density is associated with meaning in life

Living around many other people may minimize the significance of one's contribution to society, thus reducing meaning

Richly manipulating population density in the lab is hard
